

Heaven / Pouffe Design / Jean-Marie Massaud

The idea underlying the Heaven project is that of lightness derived from forms emerging from hollow spaces bordered by interweaving lines. The thin, woven steel frame is the distinctive feature of a collection marked by well-proportioned lines and overall harmony. Steel chairs paired with transparent glass tops lighten the table surfaces, lending them an intangible quality. The harmonious and sophisticated shapes of the Heaven range of furniture give the impression of unconventional elegance.

Description

Code: **495+495/S**
Typology: **Pouf**
Collection: **Heaven**

Static Load: 100 Kg
Cushion Material: Tessuto
Standard

Technical Info

Width: **45 cm**
Depth: **45 cm**
Height: **46 cm**
Weight: **5.4 Kg**
Static Load: **100 Kg**

Packaging

Packages: **1**
Pieces for pack: **1**
Dimensions: **48x48x49 cm - 48x48x7 cm**
Volume: **0.129 mc**
Polyethylene bag and cardboard box

Materials

Fabrics Standard

Acrylic fabric: a fibre whose base element is a polymer chain consisting of 85% acrylonitrile. Acrylic fibre combines the aesthetic qualities of a luxurious fabric with the texture and feel of wool with the functional qualities of resistance to the elements: UV resistant, it does not stain and does not rot upon contact with water as it is fast-drying.

Polyester fabric: a fibre composed of linear macromolecules consisting mainly of polyethylene terephthalate. It has excellent mechanical properties: it withstands breakage, light and abrasion. It does not deform permanently, it has an excellent elastic recovery and is waterproof.

Polypropylene fabric: these are fibers that are generally very fine, with a high surface tension, thanks to which water can pass through and flow out quickly. Strength and durability are among the main advantages offered by this material, which also provides good thermal insulation.

Fabric 85% polypropylene, 15% polyester: mixed fabric with the two fibres mentioned above.

Maintenance:

Avoid prolonged contact with greasy substances and/or dyes or colorants that could be absorbed by the covering material and cause permanent stains, as well as deteriorating the yarn structure. In the case of use near the sea or swimming pools, periodic washing is recommended. Frequent washing: follow the specific instructions given on the label for each material. Use water and non-abrasive, colorless, neutral PH liquid detergents. If necessary, allow the detergent to act for a few minutes. Rinse thoroughly with water at a temperature not higher than 30°C (86°F). If pressure cleaning devices are used, keep the tip of the nozzle at a distance of at least 60-70 cm from the surface of the product. If necessary, repeat the operation. Do not use abrasive sponges to remove stains and do not treat with bleach or chlorine.

Steel

Iron and carbon alloy, with carbon content below 2%, treated to withstand the elements with the unique EMU-Coat anti-corrosion process.

Maintenance:

Avoid prolonged contact with greasy substances and/or dyes or colorants that could be absorbed by the covering material and cause permanent stains, as well as deteriorating the yarn structure. In the case of use near the sea or swimming pools, periodic washing is recommended. Frequent washing: follow the specific instructions given on the label for each material. Use water and non-abrasive, colorless, neutral PH liquid detergents. If necessary, allow the detergent to act for a few minutes. Rinse thoroughly with water at a temperature not higher than 30°C (86°F). If pressure cleaning devices are used, keep the tip of the nozzle at a distance of at least 60-70 cm from the surface of the product. If necessary, repeat the operation. Do not use abrasive sponges to remove stains and do not treat with bleach or chlorine. To keep the product in good condition for a long time, we recommend storing it indoors and in a dry place during the winter to prevent condensate from forming. Before the winter and on a quarterly basis, if the
